Why use *co-operative* website hosting?

Co-operatives are much better than capitalist businesses.

They keep money in shared hands and usually in the local economy.

They follow ethical principles ...

Co-operatives value self-help, democracy, self-responsibility, equality, equity, solidarity, honesty, openness, social responsibility and caring for others, without gender, social, racial, political or religious discrimination.

Co-operatives are autonomous, jointly-owned and democratically run.

➔ *Webarchitects webhosting co-op has client, investor and worker members, ensuring good decision-making through general meetings.*

Co-operatives provide information, education and training for their members, employees and the public.

➔ *Webarchitects offers online support and information, and also has run public sessions on internet security and webhosting.*

Co-operation among co-operatives is working together to serve members effectively and strengthen the movement.

➔ *Webarchitects works with members and partner co-ops to give a more effective service than 'competitive' commercial companies can.*

Co-operatives work for sustainability through policies approved by members.

➔ *Internet servers are a significant contributor to global warming, so Webarchitects uses only 100% sustainable power.*

*Webarchitects is a long established **ethical webhosting co-operative**. We offer **systems administration** and **high-security** hosting for all websites from the very small to the international, using **free open source** software and **zero fossil fuel** usage.*

We're down-to-earth, with real humans to speak to. Ask us for advice – or ask one of our many satisfied customers.
