

WordPress websites: HOW CAN I GET HELP?

Don't panic! Let Webarchitects help you to get online with WordPress.

Although WordPress is very popular for making websites, there are pitfalls and decisions to be made.

Get started fast; we provide free installation, and everything you need to set up securely, ethically and easily.

Key updates are done by WordPress, but for some the user must take action. Let Webarchitects take care of all this.

There are many WordPress plugins, but some have nasty features like pop-up adverts. So do "free" WordPress.com sites. We add only selected security plugins – and update automatically.

Some people don't realise that user-names and passwords should always be encrypted, using *https*. This needs a security certificate – so we include this.

Don't trust Google? We don't! Avoid using *Google Analytics* for visitor statistics – we provide a secure and easy-to-use alternative.

Webarchitects WordPress Package also features:

Domain name included (.uk).
(Additional names can be purchased).

The theme of your choice installed.

Mobile-friendly, both for updating your website and for users viewing it.

1GB of space for files (additional space available at reasonable prices).

MySQL database (additional available).

Free advice before starting up.

Free technical support, 30 mins p/a.

*Webarchitects is a long established **ethical webhosting co-operative**. We offer **systems administration** and **high-security** hosting for all websites from the very small to the international, using free **open source** software and **zero fossil fuel** usage.*

We're down-to-earth, with real humans to speak to. Ask us for advice – or ask one of our many satisfied customers.
